Newcomer Temp Links

1. Beyond the Tool - Reimagining AI as Your Collaborative Partner - A nice little presentation on shifting our mindset.
2. Newcomer AI mini course - He showed this briefly
3. Mainstream chatbot links (click the name) and feature compare - He showed briefly
4. Newcomer Bot Hub - A list of some bots you have seen, and many you have not. Also includes a locally stored notes feature for you.
5. Newcomer's Prompt Collections - Prompt collections inspired by the Newcomer's Activities (some good prompts, some not so good 😉). It showcases several different LLM Vibe builds and is a good way to explore prompt examples.
6. Notebook LM - The research king (more on that later)
7. The scrolling AI Acceleration presentation - Was displaying before we got started, and someone asked about it.
8. The Great Acceleration Report - A very comprehensive interactive report built for Higher Ed BOD's and Administrators. Todd leveraged three different frontier models to synthesize industry data sources and surface themes and areas of consensus. More strategic than much of the other shared content and a deep reference section.
